Dear Mr. Olson:

Your Small Customer Plan (Plan), as required by the National Energy Policy Act, was approved by the Western Area Power Administration (Western) on March 7, 1997. It is now time for you to make an annual report to Western regarding the status of that Plan.

Western's Final Rule states: "Every year on the anniversary of submittal of the Plan, small customers must submit a letter verifying that their annual energy sales or usage is 25 GWh or less averaged over the previous five years and identifying their achievements against their targeted action plans. The letter will be used for overall program evaluation and comparison with the customer's Plan and for verification of continued small customer status."

Utilities lose their small customer status if sales or usage exceeds 25 GWh per year or if they have become a member of a joint action agency that has power supply responsibility. Small customers are also required to submit a new Plan every five years, however, if you find that your current Plan no longer meets the goals of your utility, you may submit a new one at this time.

If you have questions concerning these reporting requirements, please telephone Ms. Diane Noennig at (406) 247-7392.

Sincerely,

Doug Hellekson
